PROFILE

Results-driven Full-Stack Engineer who designs, builds, and ships production web systems end-to-end — from relational database schemas and secure REST APIs to responsive frontends and Dockerized, production-grade hosting. I pair an efficient AI-augmented workflow with rigorous engineering: clean architecture, type safety, thorough documentation, and solid Git hygiene. I communicate proactively in English and collaborate fluidly with international teams across time zones.

EXPERIENCE

Full-Stack Developer

2021 – Present

Building and shipping production web systems end-to-end for a company's internal and customer-facing needs:

- Designed and shipped a company-wide **HRIS** (Human Resource Information System) covering employee data and reporting workflows.
- Built a **security-guard attendance system** with patrol **video reporting** — replacing manual logs with a digital, auditable workflow.
- Developed an **online store with an integrated payment gateway**, handling the full checkout-to-payment flow.

SELECTED PROJECTS

wibotodo

LIVE DEMO

todo.wibosystems.com

Productivity app with an analytics dashboard, PDF/Excel reporting, image uploads, and JWT auth. One-click demo, no signup — built to showcase modern TypeScript engineering.

NestJS 11 · Angular 21 · Prisma · PostgreSQL · Tailwind

BerkahPOS

SAAS

berkahpos.com

Web-based Point-of-Sale for retail & small businesses: fast checkout, product and stock management, transactions, and automated encrypted backups.

Laravel 12 · Nuxt / Vue · MySQL · Docker

Planku

FINTECH

planku.id

Smart finance & budgeting app — track income and expenses, plan budgets, and generate clear financial summaries and reports for individuals and small businesses.

Laravel 12 · Nuxt / Vue · MySQL

KiosWarga

MULTI-TENANT SAAS

kioswarga.id

Multi-tenant SaaS that helps local "warung" / kiosk owners run their stores online — tenant onboarding, store management, and a clean public app / API split.

Laravel 12 · Nuxt / Vue · MySQL · Multi-tenant

HOW I WORK

I take applications from concept to production-ready deployment: database design, secure RESTful APIs, responsive UIs, and Dockerized hosting on my own infrastructure (Hetzner / Coolify / Cloudflare / Nginx). Open to a free trial task — built end-to-end, deployed on my own server, with a live demo and full source-code access for review.

SKILLS

Backend

NestJS · Laravel · Node.js · Prisma

REST APIs · JWT Auth

Frontend

Angular · Vue 3 · Nuxt · Tailwind CSS

Chart.js

Data

PostgreSQL · MySQL

DevOps

Docker · Coolify · Hetzner · Cloudflare

Nginx · GitHub CI

AT A GLANCE

Production apps **4+**

Timezone **GMT+7**

Availability **Contract / Remote**

Languages **English · Indonesian**

STRENGTHS

End-to-end delivery · Clean architecture

Type safety · Documentation · Git hygiene

Proactive comms
